Windows application to help you Clear Read-Only Torrent Download file and folder attributes. I work in the energy industry and I need to have a lot of text copied into a spreadsheet. Of course, the only problem is that I don't have a scanner, so I would have to do this manually. I don't have enough time, so I was wondering if there was any software that I could use for that purpose. I have looked into several web sites for free software and none of them seemed to fit my needs. I want to be able to specify what types of files I want copied over and then have the software use my computer's mouse and keyboard to copy the files. I don't need the files to be edited in any way, they just need to be added into a spreadsheet.
